PROFILE

Results-driven Full-Stack Developer with a decade of experience building scalable, responsive, and secure web applications using MERN, Java/Spring Boot, Laravel, and Django. Proven track record of delivering robust solutions across sectors like healthcare, e-commerce, Socio-finance and SaaS. Passionate about clean code, user experience, and continuous learning.

CORE SKILLS & TECHNOLOGIES

Frontend: React.js, Vue.js, Angular.js, Next.js, Vite, TailwindCSS, Bootstrap, TypeScript, Livewire

Mobile: Flutter, Dart

Backend: Laravel, Java/Spring Boot Node.js, Express.js, Django, RESTful APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Docker, Kubernetes, Postman, Webpack, NGINX, PM2

DevOps: GitHub Actions, CI/CD pipelines, Linux servers, Nginx, Heroku, Vercel, Netlify

Testing: Jest, PHPUnit, Pytest, Postman, Cypress

Others: JWT, OAuth2, Stripe, WebSockets, Firebase Auth, Redis, Socket.IO

WORK EXPERIENCE

Business Technology Consultant

Norak Technologies — January 2026 - Present

Tech Stack: JavaScript/Node.js, MERN, PHP/Laravel, MySQL

- Mentored developers on Laravel/Node.js/Spring Boot best practices, improving code quality and efficiency.
- Bridged business goals with technical execution, ensuring user-centric, scalable solutions for clients.
- Architected and reviewed application structures to support long-term scalability and performance.
- Led code reviews, enforced testing standards (PHPUnit/Jest), and reduced technical debt.
- Actively contributed to coding complex features and resolving critical production issues.
- Created REST APIs for clients TPL integration running on Java/Spring Boot.

IT Director

Gavice Logistics — Jun 2021 - Nov 2025

Tech Stack: MERN, Laravel, Spring Boot, Flutter/Dart

- Built a Logistics management system used for the entire firm's operations.
- Built Customer facing mobile Apps
- Created REST APIs for clients TPL integration.

Fullstack Developer

Freelance / Remote — Jan 2022 - Present

Tech Stack: Java/Spring Boot, MERN, Laravel, Django, Tailwind, PostgreSQL

- Built and deployed 10+ client projects, including CRM dashboards, booking platforms, and e-commerce systems.
- Developed a healthcare appointment system using Django + React that reduced patient wait time by 45%.
- Integrated Stripe payment gateway and real-time notifications using WebSockets in a Laravel-based app.

Backend Engineer → IT Manager

Technedify, Lagos, Nigeria — Mar 2021 - July 2023

Tech Stack: Laravel, Node.js, MySQL

- Spearheaded improvements of Laravel-based E-Learning platform, enhancing performance.
- Led database optimization and indexing, reducing query load times by up to 40%.
- Promoted to IT Manager in 2022; led infrastructure scaling up.
- Conducted developer training on Laravel best practices, ensuring quality and team growth.
